

# COMPARING MOBILE LICENCE TYPES

## OBJECTIVE

This document compares the different types of mobile licences offered by **Maestro Technologies**.

- The standard licence provides full access to **maestro\*MOBILE**, depending on the modules used, for a wide range of users.
- The "Employee" licence can be considered a lighter version of the standard licence: it gives more limited access and, in particular, it allows employees to enter their time.
- The "Portal" licence allows a large number of employees to access their employee profile and employment documents.
